Guide to Streets--Newport News

The city is numbered on the decimal plan—that is, one hundred is allowed each block. For streets running north, numbering begins usually at 20th and 23d streets, the commencing numbers being 2000 and 23000, respectively. West avenue is the main starting point for streets

running east, the 1000 numbers beginning with that street. The stranger may be better guided by remembering that all streets designated by numbers, such as 24th, 25th, etc., run east, with the one exception of Hampton avenue. Those designated by names run north.

City Directory Don'ts

DON'T put your Directory in an out of the way place, but keep it in a place that your customers can see and use it without stopping some ONE to find it.

DON'T think that a Directory is paying for itself unless you use it more than an idle clerk can make you money.

DON'T look mad when a customer asks to look at your Directory.

DON'T look happy when a neighbor wants to borrow your Directory, for if you do, he will borrow again and if all were borrowers, when would the next Directory be published?

DON'T forget that an up-to-date city must have a Directory and a merchant that has no DIRECTORY is what?

DON'T forget that a Directory borrower to-day will forget to return it to-morrow and you call him what?

DON'T forget that the man who has a Directory pays for it and the borrower gets for nothing what another man pays for. What do you call him?

When a man advertises his business it is conclusive that he is not ashamed of it, especially if he does his advertising in the Newport News City Directory.

Accident Insurance.
